1. The first group of respondents (n = 10) was asked to identify the most important factors influencing their decision to use a mobile app. The factors were ranked from 1 (most important) to 5 (least important). The factors were: (1) ease of use, (2) reliability, (3) security, (4) cost, and (5) customer support. The results showed that ease of use was the most important factor, followed by reliability, security, cost, and customer support.
