[illegible]A vertical ruler with markings from 1 to 6. The markings are horizontal lines of varying lengths, with the longest lines at the top and bottom, and shorter lines in between. The numbers 1, 2, 3, 4, 5, and 6 are printed at the top of the ruler, corresponding to the markings.

1. The first group of respondents (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The second group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The third group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The fourth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The fifth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The sixth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The seventh group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The eighth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The ninth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study. The tenth group (n = 10) was composed of students who had completed the course and were currently employed in a health care setting. They were contacted via email and invited to participate in the study.
