[illegible]

Figure 1 is a schematic representation of the experimental design. It shows two parallel timelines for 'Control' and 'Experimental' groups. Both groups start with a 'Baseline' phase. The 'Control' group then enters a 'Training' phase, which is divided into 'No feedback' and 'No feedback' segments. The 'Experimental' group also enters a 'Training' phase, which is divided into 'No feedback' and 'No feedback' segments. After training, both groups proceed to a 'Test' phase, which is further divided into 'Pre-test' and 'Post-test' segments. The 'Test' phase is marked with a vertical line, indicating the point of measurement.

[illegible]

The diagram is a vertical timeline with a central axis labeled with years from 2010 to 2015. To the left of the axis, there are several colored boxes (red, blue, green, yellow, orange) representing different phases or milestones. To the right of the axis, there are several empty rectangular boxes, likely intended for additional information or notes.

[illegible][illegible]

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a screen. The screen displays a 3x3 grid of colored squares. The participant is asked to identify the color of the squares. The diagram includes labels for the participant, the screen, and the grid of colored squares.
